

Good morning!

The Nature Conservancy has posted Grand Calumet River Restoration Crew Member positions. Please help us to share this widely and with anyone who may be qualified/interested. Please see the attached position profile for more information. This position will help manage more than 500 acres containing a mosaic of rich habitats, including globally rare dune and swale habitat. Restoration efforts are geared toward helping delist the Grand Calumet River as an Area of Concern by reinstating beneficial uses related to wildlife and wildlife habitat. This is a 1-year position with an approximate start date of late May 2019. This posting closes 11:59 PM EST on May 3, 2019, so please urge interested parties to apply as soon as possible. This position can also be found at our website: <https://www.nature.org/en-us/connect/careers/>. Thank you for your assistance with helping us spread the word and please do not hesitate to ask if you should have any questions. Please also feel free to share my contact information with interested candidates if they have any questions/comments/concerns.

Thank you,

Kate
